

	A	B
1	Plant Variety Data: Nicotiana tabacum	Year:
2	Variety	Tofta
3	Plant length Untopped (to crowfoot) - cm/in	91.44 / 36
4	Plant length Topped - cm/in	91.44 / 36
5	Leaf length (length of 10th leaf from bottom, at maturity) -	48.26 / 19
6	Leaf width (width of 10th leaf from bottom, at maturity) - c	25.40 / 10
7	Leaf number topped (exclude 2 bed leaves)	14-16
8	Days at maturity (transplant to 50% plants 1 flower)§	54 days exact
9	Plant form (pyramidal, columnar, inverted cone, other)	pyramidal
10	Flower color (white, pink, red, other)	pink
11	Flower head habit (closed, intermediate, open)	open
12	Leaf attachment (sessile, petiolate)	sessile
13	Leaf carriage of midrib (arched, not arched)	not arched
14	Leaf color (light green, green, dark green)	green
15	Leaf margin (wavy, not wavy)	not wavy
16	Leaf angle (upper angle between stalk and 10th leaf) - degree	45°
17	Leaf margin (recurved, not recurved)	not recurved
18	Leaf surface (smooth, puckered)	smooth
19	Stalk diameter - cm/in	2.54 / 1
20	Tip shape (e.g. acute, acuminate, obtuse.)	acuminate
21	Venation pattern (square, angular)	angular
22	*Auricle configuration	equal, slight descend.
23	*Spacing - sq. ft. per plant	3.75
24	<p>*Variety Comment §Maturity: trans date: bagging date + 6 = est days at maturity</p> <p>1st hornworm eggs (1 tiny worm) 01 JUL 15 tiny 06 JUL 2nd wave small hornworm Leaf photo:</p>	<p>Swedish land race Dark air-cured.</p> <p>to tray 8 MAR topped 28 JUN at ~17 leaves stalk-cut 24 JUL seed bag cut 2 AUG suggestive of Catterton or Keller seed plant stalk-cut 05 AUG</p>
25	*non-GRIN data field	*Goff - general Habitus:
26	germination start date	3/1/23
27	transplant date	5/4/23
28	bagged date	06/22/23
29	days at maturity first bagged =	06/27/23
30	first priming date
